Collecteur d'échappement (ici, type 6 cylindres)

Figures 4:

Figures 5:

Figures 6:

Figures 7:

Figures 8:

buse de dépose de joint détecteur de métaux *p*

Figure 9 On donne ci-dessous le trajet de la buse en fonction du collecteur 3, 4, ou 6 cylindres :

Figure 10 On donne ci-dessous les trajectoires détaillées de la buse :

Convention : trait épais = dépôt de joint liquide ; trait fin = transition entre 2 trous

NB: pour plus de clarté, les extrémités du joint liquide ont été décalées sur les 2 figures ci-dessus.

Figure 11 On donne les formes possibles des extrémités du joint liquide :

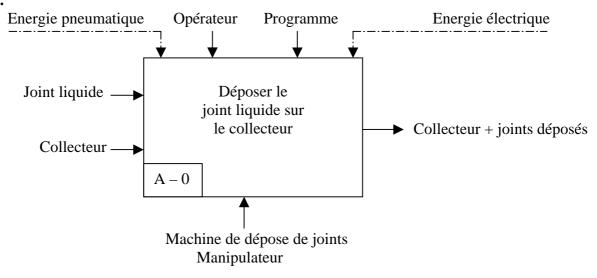

Grafcet relatif au cahier des charges n°1
